4 BEACH WASTE MANAGEMENT								
A local CBO, Bagamoyo Beach Lovers is currently working towards developing a cleaner, safer, healthier and a more beautiful beach environment for everybody to enjoy. The main challenge is the debris that is washed up daily at high tide, which if not removed just encourages people to discard their own litter.								
BBL's activities include: Employing workers to collect rubbish along a 2 km stretch of beach; has sponsored bins for people to deposit their rubbish; working with the local district to collect the waste and responsibly dispose of it. School programmes on the importance of environmental management, creating volunteer opportunities , caretaking mangroves . Recycling projects to enhance lives and livelihoods especially for women and the youth, commencing with jewelry and crafts using locally sourced materials from the beach .
